

Research gaps in illicit drug use and Aboriginal health

Epidemiology and or data driven

- IDU + health outcomes
- Drug related hospital admissions
- Overdoses and drug related deaths
- Resilient drug users
- Trends, prevalence, characteristics, regions

Types of drugs

- Prescription drug use
 - Fentanyl
 - methamphetamines
 - Poly drug use
-
- Impact, prevalence, trends,

Strengths based approaches

- Culture
- Youth programs
- Incentivised treatment
- Role models-elders and young people
- Peer educator models
- Community led interventions

Populations

- Young people and transition to IDU
- Trial of NSP in Prison
- Women and Men programs

Clinical trials

Treatment outcomes- especially for
methamphetamines, other newer drugs

Workforce research issues

Inclusion of Aboriginal people in clinical trials
